

Contact Lenses for Every Need

People like to have choices when it comes to their eyewear. That's why we offer flexible plans and enhancement programs for your contact lens wearers.

Signature Contact Lens Care Program

Members who currently wear soft contacts or are interested in soft contacts may benefit from our special Signature Contact Lens Care Program. The program is designed to provide members the widest selection of the most popular lenses on the market, including toric, multifocal, and hydrogel lenses.

If a member selects a lens from a tier that is above their allowance they pay the difference between their allowance and the tier price. If the member selects a lens from a tier that is below their allowance they may apply the remaining balance toward additional contact lenses.

Some members may have additional charges for instruction, training, problem solving, or follow-up services based on the VSP doctor's professional determination.

Contact Lens Services	<ul style="list-style-type: none"> • A thorough initial fitting and evaluation by a VSP doctor is covered in full. • The evaluation ensures proper fit of the contact lenses, but does not take the place of a comprehensive eye exam, which is a check for overall health of the eye.
Contact Lenses	<ul style="list-style-type: none"> • An initial supply of contact lenses is covered from the VSP doctor who performed the contact lens fitting.

Product	Manufacturer	Boxes Covered	Replacement Wearers	New/Refit Wearers

SofLens Toric	Bausch & Lomb	4	\$150	\$190*

*New toric and multifocal contact lens wearers will always require additional professional services and cannot participate in this program.

Elective Contact Lens Allowance

We believe choice is important and members can always choose any contact lens brand. If a member chooses a contact lens not currently part of the Contact Lens Care Program, they have the flexibility to use their elective contact lens allowance anyway they choose. The allowance can go toward contact lens services and contact lenses.

Members will always receive 15% off all contact lens services from their VSP doctor.

Good eyecare supports good health.

That's why contact lens wearers need a comprehensive eye exam in addition to a contact lens fitting and evaluation. A thorough exam can catch early warning signs of serious health conditions like diabetes, high blood pressure, and high cholesterol.
