Traditional (less than 24)	97%	87%	100%	85%	92%	62%	94%	69%

^a Response rate (number of respondents divided by sample size) is adjusted for non-deliverable mailing addresses.

^b Oversampled students are included in institution numbers but not in consortium, Carnegie, or NSSE 2004 sample numbers.

^c Sampling error is an estimate of the margin by which the 'true' score for your institution on a given item could differ from the reported score. To interpret the sampling error, assume that 60% of your students reply "very often" to a particular item. If the sampling error is +/-5%, then the true population value is most likely between 55% and 65%.

^d Each number represents the percent of total respondents within the category.
