Motion Approved by SCAP meeting on April 24, 2007 Regarding Program Review Criteria

The members of SCAP acknowledge the revised Program Review Criteria (draft) recently received from the Senate. We have reviewed it and have two fundamental concerns: 1) we are not convinced that an attempt to assign objective quantitative weight to each criteria is advisable, and 2) we have concerns about the ordering of the criteria and whether or not reducing the criteria to only four is advisable. We move, therefore, the establishment of a University Senate/SCAP joint sub-committee to collaborate on a final draft of the Program Review Criteria. The sub-committees would have dialog next fall about these primary concerns and possibly others as they arise and report back to SCAP and the Senate by December 2007.

Dr. Maria Calzada, University Senate to SCAP, offered to take the approved motion to the Senate.
