## Annex B International Poultry Networks

---

### Network for Smallholder Poultry Development

[www.poultry.life.ku.dk](http://www.poultry.life.ku.dk)

The Poultry Network is globally recognized as a multidisciplinary centre of excellence, when it comes to using poultry as a tool for alleviating poverty and empowering women. The Network and its partners have supported poverty-focused poultry activities in the following countries: Bangladesh, Benin, Bolivia, Burkina Faso, Eritrea, Ghana, India, Kenya, Malawi, Mozambique, Nicaragua, Senegal, South Africa, Tanzania, Vietnam and Zimbabwe. A powerful triangular connection between research, field level activities, and education & training are the cornerstones in the Poultry Network's approach to poverty alleviation. The Network's main areas of expertise are support to project identification, formulation, implementation, monitoring and evaluation, research identification and support, curriculum development, development of farmer field schools, training of trainers' courses and research-based higher education programmes.

### International Network for Family Poultry Development (INFPD)

[www.fao.org/ag/againfo/subjects/en/infpd/home.html](http://www.fao.org/ag/againfo/subjects/en/infpd/home.html)

INFPD is mainly an Information Exchange Network. One of the objectives of the INFPD is to encourage higher standards that can sustainably increase the productivity of the family poultry sub-sector's. This will be achieved through providing advice and collecting data and detailed information about family poultry production systems. Information is disseminated through a trilingual (English, French and Spanish) newsletter, which is produced twice a year and distributed electronically with a printed version for members without e-mail facilities.

### Rural Poultry in Developing Countries

[www.kyeemafoundation.org](http://www.kyeemafoundation.org)

This rural poultry website was developed by staff of the School of Veterinary Science at the University of Queensland and funded by the Australian Centre for International Agricultural Research. The aim is to provide a resource for farmers and workers from research and diagnostic laboratories, extension services, non-government organizations and development agencies. It is hoped the website will encourage collaboration between these groups and provide a forum for the exchange of information and ideas about rural poultry.
