

Checking your Loyola Voicemail from home or anywhere.

2 ways:

1. Dial 865-2000, the operator will welcome you to Shoretel and then ask you to enter your extension, then ask your VM password. Follow the prompts to check your VM. The password is different from your Shoretel Communicator password. If you need this reset let the Help Desk know. x2255
2. You can also check your Voicemail using this website. The userid and password will be the same as your Shoretel Communicator settings.
